

ESCAPE FROM SING SING

20:20

Find the shortest path through the labyrinth of cells to escape from the famous prison Sing Sing.

- You start in the cell with a prisoner in it and can go in any of the four doors leading out of it.
- When navigating the rest of the cells, you have to follow the directions written in the cells:
 - ◊ Turn left in cells marked with L and right in cells marked with R.
 - ◊ Make a U-turn in cells marked with U (i.e., leave through the same door as you entered).
 - ◊ Go straight without turning in cells marked with S.
 - ◊ Go in any direction in cells marked with +.
- You are allowed to visit a cell multiple times.
- You cannot enter the cell with a guard in it.
- You must exit the prison through the door on the right (marked with an arrow leading outside).
