

~ Cheese Shop ~

The first five clues allow to figure out the placement of types of cheese on the shelves.

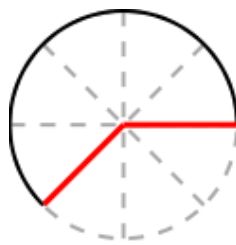

From clues 2 and 3, brie and swiss are in the left and middle columns of the top shelf, respectively. From clue 5, no cheeses with 135° wedges cut out of them are in the right column, so from clue 4 camembert and emmental are in the left and middle columns of the bottom shelf, respectively. Now cheddar and parmesan are left in the right column, but from clue 4 cheddar can't come after emmental on the bottom shelf, so cheddar is on the top shelf and parmesan is on the bottom.

brie	swiss	cheddar
camembert	emmental	parmesan

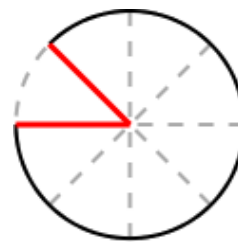

The last five clues allow to figure out the orientation of each cheese wheel.

brie

swiss

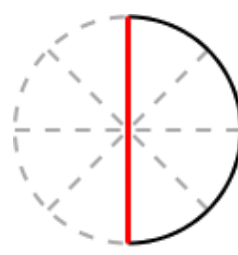

cheddar

camembert

emmental

parmesan

Finally, the answer is spelled by the cuts on the cheese wheels using semaphore alphabet.

ANSWER: SMOKED
