

~ Candy Exchange ~

In each candy exchange puzzle you start with candy of several types. You want to do the shortest possible sequence of trades with the candy shop owner so that you end up with candy of exactly one type (the number of candy you end up with doesn't matter).

The trades you can do are the same for all puzzles; note that they are one-directional.

T:   → 	C:     →   
P:   →  	O:     →  
R:    →  	E:     → 

Here are the puzzles. You can solve each one using three trades or less.

You end up with candy of type  in 2 puzzles and type  - in 4 puzzles.
