

FLYING PIGS

You've built pens for flying pigs. Being, well, flying pigs, they pick their own accommodation in full accordance to their preferences. Can you figure out what creature joined them?

- Pigs only occupy designated pens (marked with gray squares).
- There is a total of 7 pigs.
- The first pig arrived early and occupied the leftmost stall.
- Each fountain has exactly two pigs next to it: one in a pen that is separated from the fountain by a wall, and one that is not. Only vertically or horizontally adjacent pens are considered to be next to each other.
- Exactly two pigs are in completely enclosed areas.
- The pigs have a total of 18 walls adjacent to them. Walls shared by pigs are counted twice.
